June 17-23

**Camp SOAR 2018**

Teacher Internship Opportunity

*Camp SOAR is a week-long summer camp designed to expose upcoming high school juniors and seniors with an interest in aerospace engineering to the research and facilities at Texas A&M University’s Department of Aerospace Engineering. During the week, students will be able to explore the field through hands-on design-build projects of airplanes, rockets, helicopters or air ships.*

High school math, science and CTE teachers in Texas have the opportunity to work with students for Camp SOAR. During the week at Texas A&M, teachers will be able to explore the field of aerospace engineering along with the students through design projects and departmental tours. Teachers will have the opportunity to interact with current students, as well as world-renowned faculty.

**Details**

Eight teachers will be selected to partner with another teacher and work with the four student groups, focusing on aircraft, rockets, lighter-than-air-vehicles and helicopters. Throughout the week, teachers will assist camp staff with exposing students to the engineering design process and the importance of teamwork.

Participants will stay on campus in modern residence halls and have use of the university's recreational facilities, the university library and the university's computer facilities.

**Benefits**

- $500 stipend
- All meals provided
- Housing provided
